

# RUCHA DILIP KENI

DATA ANALYST | SUPPLY CHAIN DATA ANALYST

FL, United States | +1 7043095357 | [rkuncc0@gmail.com](mailto:rkuncc0@gmail.com) | [LinkedIn](#) | [GitHub](#)

## Summary

**Analyst** with **3+ years** of **supply chain** and **data analytics** experience. Delivered a **Power BI S&OP** dashboard that boosted executive decision speed by **40%** and built automated **SQL/Python ETL** pipelines processing **5 M+** daily records, cutting **data errors by 28%** and reducing reporting time to **45 minutes**. Proficient in **SQL, Python, Power BI, SAP MM/SD, Oracle ERP**, and **Tableau** to optimize inventory, demand planning, and supplier performance. Seeking to leverage analytical and automation expertise to drive data-driven decision making and operational efficiency.

## Core Skills

- **Supply Chain & Operations:** Supply Chain Management, Inventory Management & Optimization, Demand Planning & Forecasting, S&OP, Procurement Analytics, PO Management, Supplier Performance, Logistics & Freight Analytics, Order-to-Cash (O2C)
- **Data & Analytics:** SQL (PostgreSQL, MySQL, T-SQL), Python (Pandas, NumPy, SciPy), Advanced Excel, VBA, Power Query, Power BI, DAX, Tableau, Data Modeling, KPI Analysis & Reporting, Dashboard Development
- **ERP, ETL & Data Management:** SAP MM/SD, Oracle ERP, ERP Data Integration, ETL Pipelines, Data Cleansing & Validation, Data Quality, Reporting Automation, Automated Data Pipelines
- **Process Improvement & Quality:** Root Cause Analysis, Process Mapping, Lean Six Sigma, SOP Development, Agile/Scrum, Functional Testing, Integration Testing, Regression Testing, Jira

## Work Experience

### HOLIDAY CHANNEL, USA | *Analyst*

**Jul 2026 - Present**

- Engineered a **Python + SQL data validation and reconciliation pipeline** to process and sync **5K+ Supabase records** across content and marketplace data, automating duplicate detection, missing-value checks, and data consistency validation to improve data quality and reporting accuracy.
- Developed **Power BI dashboards and KPI reports** covering **multiple content, search, and marketplace and user-behavior metrics**, performing trend and performance analysis to identify anomalies and track operational KPIs through automated, centralized reporting.

### BARNES & NOBLE EDUCATION, INC., USA | *Supply Chain Data Analyst*

**Aug 2024 - May 2026**

- Analyzed **20K–30K records** across prior-term sales, inventory, course requirements, and enrollment data to identify **stockout/excess inventory risks**, reducing stockout incidents by **12%**; identified internal transfer opportunities that reduced external supplier orders by **10%**.
- Built a recurring **Power BI dashboard** with **DAX** measures that consolidated inventory, stockout risk, purchase orders, and shipment data, giving stakeholders real-time visibility, cutting weekly reporting time by **5 hours**, and flagging delayed POs to reconcile data, which resolved over **90%** of inventory discrepancies within the same reporting cycle.

### CAPGEMINI TECHNOLOGY SERVICES, INDIA | *Analyst*

**Aug 2021 - Jun 2024**

- Led development of a **Power BI S&OP** dashboard that integrated **SAP MM and Oracle ERP data**, providing executives real-time **KPI** visibility and improving decision-making speed by **40%**
- Designed automated **SQL + Python ETL pipelines** to cleanse and validate **5M+ daily supply chain records**, reducing data processing errors by **28%**; and **cutting reporting time from 6 hours to 45 minutes** conducted statistical root cause analysis of forecast gaps, **reducing forecast bias by 9%**.
- Developed **Tableau + SQL freight spend and carrier performance analytics** to identify cost-saving opportunities, supporting a **7.2% YoY reduction in logistics spend**; analyzed SAP SD order-to-cash exceptions and contributed to SOP improvements that reduced fulfillment exceptions by **30%**.

### SIEMENS, INDIA | *Operations Analyst*

**Jan 2020 - Jul 2021**

- Analyzed material availability, inventory balances, purchase orders, and usage records in SAP and Excel, identifying shortages, excess stock, and delayed orders 3–7 days before they could affect production; this early detection enabled planners to adjust schedules and avoid production delays
- Automated and consolidated **weekly inventory and PO reporting**, reducing report preparation time by **20%**; monitored supplier delays and material shortages with procurement and warehouse teams, contributing to a **15% reduction in delay incidents**.

## PROJECTS

### Customer electronics case study | <https://github.com/Rkruhh/Supply-Chain-Case-Study.git>

- Built an end-to-end planning case (DTC, marketplace, retail). Cleaned multi-system inventory and SKUs; scored forecast bias vs noise. Identified a 2,100-unit error and 1,260-unit duplicate receipt; restated sellable stock (ATP) by colorway and location. 13-week buy plan with safety stock from actual lead-time variance; rebuilt true cost/order and a not-just-margin allocation rule.

### Supply Chain Analytics and Optimization | <https://github.com/Rkruhh/PandasProjects.git>

- Analyzed a 100+ record beauty supply-chain dataset to evaluate inventory levels, demand, supplier performance, lead times, manufacturing costs, shipping costs, and defect rates. Developed supply-chain KPIs and data visualizations to identify inventory risks, supplier inefficiencies, logistics cost drivers, and opportunities for operational improvement

## EDUCATION

University of North Carolina at Charlotte | *MS, Information Technology*

Charlotte, NC, US **Aug 2024 - May 2026**

University of Mumbai | *BE, Computer Science*

Mumbai, India **Jun 2017 - May 2021**
