Rucha Dilip Keni

Supply Chain Analyst

Florida, USA | +1 813-358-6151 | rucha.k@itjobinbox.com | GitHub | LinkedIn

SUMMARY

Supply Chain Analyst with 5+ years of experience in medical devices, retail, manufacturing, and procurement. Forecast demand and manage inventory using Python, SQL, Excel, Power BI, and SAP MM. Lowered forecast error (MAPE) from 38% to 29%, cut stockouts by 31-32%, and removed $2.1M and $2.4M in excess inventory at two employers. Replaced manual reports with Power BI dashboards, cutting monthly reporting from 6 days to 2, and worked with commercial, warehouse, and supplier teams to raise on-time delivery from 74% to 90%.

EXPERIENCE

Johnson & Johnson, USA | Supply Chain Analyst II — Jul 2026 – Current

- Support statistical demand forecast models in Python and SQL across 800+ medical device SKUs, integrating historical sales trends with commercial inputs to improve MAPE-based forecast accuracy against baseline.
- Maintain and enhance consignment stock and hospital inventory tracking dashboards in Power BI, reducing manual reconciliation effort by 40% and supporting SLOB inventory reduction of $1.6M.
- Coordinate S&OP/IBP demand review inputs with Commercial, Warehouse, Customer Service, and Quality teams across 6 distribution regions, contributing to a 14% reduction in forecast bias.
- Build scenario analysis models in Excel and SQL for new product launches and supply disruptions, supporting proactive mitigation for 25+ risk events and protecting 97% on-time delivery.
- Consolidate multi-source KPI reporting (forecast accuracy, inventory turnover, OTD) into a single Power BI suite, shrinking monthly reporting cycle from 6 days to 2 days (67% faster).

Barnes & Noble Education, Inc., USA | Supply Chain Analyst — Aug 2024 – May 2026

- Modeled semester-driven textbook demand forecasts in SQL and Excel using historical sales and enrollment data, reducing peak-season stockouts by 32% across 700+ campus stores.
- Designed inventory replenishment plans in the ERP system for textbook seasons, improving fill rate from 88% to 95% while cutting post-semester excess inventory by $2.1M.
- Automated distribution planning reports allocating stock to stores based on regional demand patterns, reducing manual planning time by 45% and improving store-level in-stock rates by 18%.
- Developed KPI dashboards for order fulfillment and inventory levels in Power BI, giving leadership real-time visibility and reducing weekly reporting effort by 50%.
- Analyzed sales and inventory data in SQL to identify slow-moving titles, driving markdown and reallocation decisions that improved inventory turnover by 13%.
- Coordinated with warehouse and logistics teams on distribution schedules, reducing average order-to-store lead time by 2.1 days (24% improvement) during peak season.

Capgemini Technology Services, India | Supply Chain Analyst — Aug 2021 – Jun 2024

- Built supplier scorecards in Power BI integrating delivery, quality, and spend data from SAP MM, improving on-time delivery from 74% to 90% across 40+ managed suppliers and reducing quality escalations by 30%.
- Developed statistical demand forecast models in Python and SQL for a global manufacturing client, integrating 3 years of historical sales with seasonality and promotional inputs, reducing weighted MAPE from 38% to 29% across 600+ SKUs.
- Automated safety stock and replenishment calculations in SQL based on demand variability and supplier lead times, reducing stockouts by 31% across A-class SKUs while maintaining 95% service level and cutting excess inventory by $2.4M.
- Designed S&OP demand review dashboards in Power BI consolidating demand plans, supply plans, and inventory positions across 8 distribution regions, reducing planning cycle time from 11 days to 6 days by replacing 4 disparate reports with a single source of truth.
- Configured and executed MRP runs in SAP MM (MRP type PD/VB), optimizing lot-size and safety-stock parameters to improve material planning accuracy by 25% and reduce expedited freight costs by $340K annually.
- Conducted root cause analysis on 15+ supplier delivery delay events using Python and SQL, applying Pareto and 5-Why analysis to identify bottlenecks that reduced average procurement lead time by 3.1 days (26% improvement).

Siemens, India | Procurement Analyst — Aug 2020 – Jul 2021

- Analyzed supplier quotes for technical components (motors, gearboxes, valves) in MS Excel, producing bid summaries that improved cost estimation accuracy by 17% across 120+ project bids.
- Aligned RFQ requirements with project specifications for 90+ procurement packages, reducing clarification cycles by 25% and accelerating bid turnaround.

- Maintained historical bid data and pricing benchmarks, enabling 15% faster vendor negotiations and more informed future cost estimates.
- Prepared vendor evaluation reports comparing techno-commercial value rather than lowest price, improving data-driven vendor selection by 20% and reducing post-award disputes.
- Presented procurement decision inputs to Project Procurement Managers, cutting decision-making time by 30% and improving project bidding competitiveness.
- Tracked purchase order records and pricing history in Excel, improving pricing transparency by 35% and supporting repeatable cost benchmarking.

PROJECTS

Consumer Electronics Supply Chain Case Study | Python, SQL, Excel | GitHub

- Built an end-to-end supply and inventory planning case study across DTC, marketplace, and retail channels, cleaning multi-system inventory and SKU data and scoring forecast bias versus noise to isolate true demand signal.
- Identified a 2,100-unit book error and a 1,260-unit duplicate receipt, restating sellable stock (ATP) by colorway and location to correct downstream planning decisions.
- Developed a 13-week buy plan with safety stock calibrated to actual lead-time variance, rebuilding true cost-per-order and a not-just-margin allocation rule to manage a Cobalt shortfall.

CORE SKILLS

Languages & Querying: Python (pandas, NumPy, statsmodels), SQL, Excel (advanced formulas, pivot tables, scenario modeling)
Analytics & Visualization: Power BI, KPI Dashboarding, Executive Reporting, Root Cause Analysis (Pareto, 5-Why), Scenario & What-If Analysis
Planning & Forecasting: Statistical Demand Forecasting, Forecast Accuracy (MAPE, Bias), S&OP / IBP, Demand Review, Safety Stock Optimization, Replenishment Planning, Distribution Planning
Supply Chain & Inventory: Inventory Optimization, SLOB Reduction, Consignment Stock Management, Inventory Turnover, Fill Rate, On-Time Delivery (OTD), Lead Time Reduction
Procurement & Supplier Management: Supplier Scorecards, Vendor Evaluation, RFQ / Bid Analysis, Cost Benchmarking, Purchase Order Tracking
ERP & Systems: SAP MM, MRP Configuration (PD/VB), ERP Replenishment Planning
Process & Collaboration: Cross-Functional Stakeholder Management, Report Automation, Process Improvement, Data-Driven Decision Making

EDUCATION

Master of Science in Information Technology | University of North Carolina at Charlotte **May 2026**
Bachelor of Engineering in Computer Science | University of Mumbai, India **May 2021**
